

## C50 Turbine Supplied to Texas Midstream Company

New Solar C50 Turbine Natural Gas Genset  
 Rated at 4600 KW, 60 HZ, 4160 V, 1800 RPM  
 Location: Texas, USA

### SUMMARY

A midstream company based in Texas contacted IMP Corporation looking for equipment to be the main source of power for their natural gas treatment facility.

### CHALLENGE

Based on the business plan forecast, an increase of 4.6 megawatts in power production need was projected, so it was determined that a turbine plant solution would be the best fit.

### SOLUTION

IMP Corporation had a Solar Centaur 50 turbine generator set available in its inventory that satisfied the needs of the midstream project. The turbine was thoroughly inspected, safely repackaged and delivered on schedule to the customer's treatment facility in Texas.

### Specs

Equipment:  
 New Solar Centaur 50 Turbine Generator Set  
 Capacity of 4600 KW, 60Hz, 4160V, 1800RPM.  
 Zero hours since new

Applications:  
 - Continuous Power

### Markets

- Oil and Gas

### Equipment

- Turbine Power Plant

### Products

- Turbine Solonox Gensets
