Completed Project

Industrial Diesel Engine

Detroit MTU 12V4000G73 Industrial Diesel Engine
Location: United States

SUMMARY

A laboratory needed an industrial engine set for research projects.

CHALLENGE

IMP needed to find a unit large enough to handle the demand for power required by engineers to conduct their research.

SOLUTION

A unit was found that fit the scope of requirements by the researchers and engineers at the lab. The unit was customized and shipped off to the laboratory where it was installed.

Specs

Equipment:
Engine Capacity of 1400 HP, 1200 RPM, Tier 2

Applications:
Prime Power

Market

- Research

Equipment

- Industrial Diesel Engine

Products

- Detroit MTU 12V4000G73 Tier 2 Industrial Diesel Engine
